Question:

After updating Codemeter Runtime on the server, the client computers do not receive a license from the license server anymore.
How can this be fixed?

Answer:

Please check if the setting for visibility of licenses in the network is still set.

Proceed as follows:

Start the **CodeMeter Control Center** on the server

To do this, use the Windows start menu and select CodeMeter -> CodeMeter Control Center. As an alternative, open Search by clicking the Search button on the Start screen: enter Codemeter and press ENTER. A dialog box opens. Click **WebAdmin** at bottom right.

Or

Enter **Localhost:22350** in the address bar of your browser.

- Select **Configuration -> Server -> Access server** in the **Network server** area and click **Activate**.
- Click **Apply**.
