Question:

Internet connection exists on your computer and the settings used for the proxy for the URLs you have set also. You try to activate your license with your product key, but the activation could not be performed. You get the message ' server not found error'. How can the license be activated yet?

Reply:

License activation:

The following description is valid for single user license as also license server licenses.

Try to activate the licenses on the computer/server via the following website online.

This Web site must be launched directly on the computer on which the license should be enabled.

<http://lc.codemeter.com/59885/depot/index.php>

In the row "Ticket", enter your **Product Key** and click **continue** your license will be displayed, click on **activate license** now.

Note: (only for license server license)

A selection appears asking for the binding of licenses.

Select firm code 6000100 on the right hand side.

'I want my licenses on one computer (CmActLicense). Firm code: 6000100 CmContainer ALLPLAN CM6 (2000)'

Sometimes multiple rows for the same license will be displayed (E.g. license number and a -u behind it) please leave all licenses checked and click on **Activate selected licenses now**.

The transfer of the license starts now. When activation is finished your license on this page should now appear with **status activated**.

If the problems with license activation occurred during the installation of ALLPLAN, cancel to exit Setup and restart the installation of ALLPLAN again. Then select in the Setup license configuration **use active license** now and the installation can continue.

Then open the license setting over **services -> utilities-> license settings**.
Or license server via **License Settings**.

Click on the left side on **license selection**. Now the license is displayed under the computer name.

License return:

This Web site must be launched directly on the computer on which the license should be enabled.

<http://lc.codemeter.com/59885/depot/index.php>

In the row "Ticket", enter your **Product Key** and click **continue** your license will be displayed, click on **re-host license** now.

Sometimes multiple rows for the same license will be displayed (E.g. license number and a -u behind it) please leave all licenses checked and click on **Re-host selected licenses now**.

The transfer of the license starts now.

Notes:

- Sometimes the license is not displayed under **license activation**, because it has been enabled via the website.
- If you want to remove the licenses, you must do so via the website again.
